SUMMARY

Software Engineer passionate about Full Stack development and Artificial Intelligence. I design high-performance web applications using modern technologies such as Spring Boot, Angular, React, and Node.js, and integrate AI solutions with Python libraries like Scikit-learn, XGBoost, and Random Forest. Curious and results-driven, I am committed to creating innovative solutions that combine performance, intelligence, and an optimal user experience.

WORK EXPERIENCE

Engineering Intern , Smart intelligent Store

Sqli Services | Jan - Sept 2025

- Developed an intelligent web platform for store management using Node.js/Express, React/Next.js, and Python, incorporating AI features and interactive 3D visualizations with Three.js.
- Optimized supervised learning models (Scikit-learn, XGBoost, Random Forest), achieving 92% accuracy for product recommendations and automated planogram generation.
- Implemented a secure JWT-based authentication system to manage access for administrators and field users.

DevOps Project, Home Management System

ESPRIT | Sept - Nov 2024

- Established a complete DevOps infrastructure using Jenkins, Git, Docker, SonarQube, Nexus, and Kubernetes, reducing deployment cycles by 40%.
- Automated testing with JUnit and Mockito, achieving 95% test coverage.
- Deployed monitoring tools with Prometheus and Grafana, reducing undetected incidents by 20% and enhancing system visibility.

Web Application, RoomSharing & Carpooling

ESPRIT | Feb - May 2024

- Built a full-stack web application using Spring Boot, Angular, and MySQL, including a secure user and role management system.
- Integrated interactive maps via Leaflet and secure payment processing with Stripe, improving interaction accuracy by 30% and transaction efficiency.
- Applied RESTful architecture and coding best practices, reducing request times by 20% and bugs by 15%.

EDUCATION

Software Engineering ESPRIT	Master's Degree in Computer Integrated Manufacturing ISETSo	Bachelor's Degree in Mechanical Engineering ISETSo
--------------------------------	---	--

SKILLS

- **Languages:** JavaScript, Python, TypeScript, Java
- **Frameworks:** Angular, Bootstrap, ReactJS, Spring Boot, Node.js,
- **Methodologies:** Agile (Scrum, Kanban)
- **Collaboration Tools:** Slack, Teams, Jira
- **Machine Learning / AI:** Scikit-learn, XGBoost, Random Forest, data preparation with Talend Open Studio
- **Development Environment:** Visual Studio Code, IntelliJ IDEA, WebStorm, Eclipse, PyCharm
- **Databases:** MySQL, MongoDB, SQL Server
- **Other Tools:** PowerBI, Postman, CI/CD, Git, Stripe, Cloudinary, Leaflet
